

**“Chubbsafes provide the highest level of protection, for cash and documents, of international standards”**

# Chubbsafes

2 in 1 Safe...

File bhi... cash bhi...

International standard, Indian at heart!

## Key Features

- Top two drawers are highly reliable for document protection using modern materials and technology.
- The quality construction of the cabinet is evident when the drawers are fully loaded, through the quality of touch and usage.
- Top two drawers are manufactured as per UL 72 standard for protecting paper from fire for 120 minutes and safe is manufactured as per Class C of IS 550 : 2003.
- The drawers are extendable for full drawer access.
- Each drawer is protected from fire. Even if one of the drawers is accidentally left open, the other closed drawer is still protected by the built in fire resistance partitions.
- These drawers are fitted with the new Chubbsafes slides allowing for a smooth and comfortable operation of the drawers.
- An interlocking system is standard and provides the ability to control access to individual drawers.
- Pilfering of a locked drawer via an open drawer is protected against by means of a steel dividing plate between each drawer.
- The bottom safe offers both fire and burglary protection.
- Ideal for NBFC, micro-finance companies, builders, business houses, and trusts. Protects cash, valuables, records, and documents.
- Safe's body is monolithic with reinforced high grade steel for inner and outer body casings and special fire and burglary resistant materials in between, providing tough resistance to any form of tool attack.
- Internal shelf and lockable drawers are standard.

### Lock Options for Drawers

The top two drawers come with a common key locking mechanism fitted to the upper-most drawer as standard.

Optional locks are available if required.

### Lock Options for Safe s

The safe is secured by high quality un-pickable eight lever dual control key locks. Combination/electronic lock is optional.

An important additional feature is an automatic re-locking device which is primed to spring & comes into action if any lock is dislodged by explosives or attacked by other means.
